The Right PC for the Right User at the Right Time

No matter your users' needs, Intel has you covered with the Intel vPro® platform, powered by 13th Generation Intel® Core™ processors.

How do you know which processors are best for your users?

Mainstream mobile users

Collaborate onsite or remotely

Need great performance on lightly-threaded tasks, industry-specific applications, and popular office software such as Microsoft Outlook and Microsoft Teams

■ Choose the 13th Generation Intel Core processor U-series.

Specialized mobile users

Need power to quickly accelerate performance based on changing demands

Pivot between basic tasks and more involved workloads, including multi-threaded apps

Create, consume, and analyze data using business-vertical apps

■ Choose the 13th Generation Intel Core processor P-series.

Premium users and mobile workstation users

Require elevated performance to handle the most sophisticated workloads, such as 3D design, augmented reality, and advanced algorithms

Include intellectual property managers and developers who handle engineering or industry-specific computing tasks

■ Choose the 13th Generation Intel Core processor H-series.

Desktop users

13th Generation Intel Core i5 processors have 14 cores and are recommended for most users.

13th Generation Intel Core i7 processors have 16 cores and are ideal for multitaskers and specialized workers.

13th Generation Intel Core i9 processors have 24 cores and are ideal for content creators and developers.

■ The 13th Generation Intel Core processor S-series offers a range of options based on users' needs.

Learn how to unlock real-world PC performance with hybrid architecture on the Intel vPro platform.
